Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: claims 12,13,29 and 30 recite the following limitations which are not supported by the original specification-the solution having a 1st component in a concentration less than about 0.1% by weight, the solution having a 1st component in a concentration less than about 0.5% by weight..

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18 and 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 18 and 35 recite an outlet, which has already been claimed in the independent claims from which these claims depend. It is therefore unclear if the applicant intends to claim that the flow passage has one or two outlets.

Allowable Subject Matter

Claims 1-15,19-32 and 36-49 are allowed.

Response to Arguments

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.
